Step 5: Install the Slats

The slats provide support for the mattress, so this step is crucial for the bed's stability:

1. Identify the slats and any support beams that may be included.
2. Lay the support beams across the width of the frame if applicable.
3. Place the slats evenly along the length of the frame, ensuring they are

spaced according to the manufacturer's instructions.

4. Secure the slats in place with the provided hardware or brackets.

Step 6: Final Checks

Once the bed frame is assembled, it's time for a final check:
